

liquid cleaners/degreasers

Since 1927, Arrow-Magnolia has helped people solve their cleaning and maintenance problems with the finest products available today.

HIGHLIGHTS

- Removes Dirt, Grease, Oil and Moisture
- Non-Corrosive
- Economical
- Will Not Harm Paint or Insulation
- Non-Conductive
- No Flash at Boil
- OSHA Approved

TYPICAL PROPERTIES

- Vapor Pressure: **58**
- Volatility: **100%**
- Solubility: **Insoluble**
- Specific Gravity: **.9**
- Vapor Density: **N/A**
- pH: **7.00**
- Evaporation Rate:
Slower than ether
- Physical Description:
Clear amber liquid w/chlorinated solvent odor

SAFETY CAUTIONS

- Keep out of reach of children.
- Shelf Life: One Year
- Store in closed, labeled containers.
- Prevent water or moist air from entering.
- Refer to MSDS for additional safety information.

HMIS RATINGS

SAFETY SOLV

Liquid

DESCRIPTION:

SAFETY SOLV is a special blend of quick drying solvents which has strong grease-cutting properties. Since it is non-corrosive, it can be used safely in cleaning and degreasing electrical motors and equipment. A medium to fast evaporating rate provides a clean surface without moisture accumulation. SAFETY SOLV will not harm or dull metallic surfaces, acts as a corrosion inhibitor and will leave a rust-free surface. It is extremely effective in spray cleaning of small electronic and radio parts. Application by dipping or cloth will provide just as effective results. It is not harmful to insulating materials such as rubber, plastic, varnish and other natural fiber and synthetic materials. This product is used in the degreasing of new machinery and equipment before initial operation. OSHA approved.

DIRECTIONS:

Use with mechanical sprayer - spray full strength onto surface to be cleaned. Use liberal amount and allow a few minutes for it to penetrate through dirt and grease layers. Remove heavy deposits and reapply. Wipe clean or allow to dry. Dries rapidly. Dipping or cloth application on small parts may be cleaned by immersing into a container and agitating slightly. Remove and allow to dry. A saturated cloth may be used as an effective means of cleaning all types of parts and surfaces.
