SAFETY CAUTIONS

- Keep out of reach of children.
- Store in original containers.
- Shelf life is one year.
- Avoid extreme heat or cold.
- Refer to SDS for additional safety information.

HMIS RATINGS

ALUMINUM BRITE HD

LIQUID DESCRIPTION:

ALUMINUM BRITE HD is a strong acidic cleaner and brightener for aluminum surfaces. It is a combination of organic surfactants, solvents and inorganic acids. It is designed to etch aluminum surfaces at a rapid rate removing the oxides and other contaminants.

ALUMINUM BRITE HD will remove road film and exhaust carbon with ease.

DIRECTIONS:

ALUMINUM BRITE HD is designed for use with or without mechanical agitation such as brushes or mops and can be used in hot or cold water.

To avoid corrosion, mix solution in a plastic pail or another suitable container. It can be diluted from 3:1 to 50:1 with water depending on application.

Apply solution to surface to be cleaned with brush or sprayer, working in small sections from the bottom upward to avoid streaking. Allow solution to remain on surface for 3 to 5 minutes. Do not allow surface to dry out during application.

Agitate surface with a long handle brush to remove heavy soils, and then rinse with clear water. Make certain that all traces of solution are rinsed away.

Avoid contact with glass or porcelain surfaces as product will etch. If contact should occur, rinse immediately with water.
