SAFETY CAUTIONS

- Keep out of reach of children.
- Store in closed, labeled containers.
- Avoid open flames.
- Refer to SDS for additional safety information.

HMIS RATINGS

CITRUS SOLV CONCENTRATE

LIQUID DESCRIPTION:

CITRUS SOLV CONCENTRATE is a powerful degreaser/tar remover made with the environment in mind. For too long the choice has been between unsafe potentially toxic hydrocarbon based products and expensive citrus based alternatives. Our CITRUS SOLV CONCENTRATE is made with all natural plant based oils and provides the cleaning power and efficiency of the harshest solvents out there.

In addition it is formulated to be thicker than normal products, allowing for excellent clinging properties for vertical surfaces.

It has a flash point of over 200°F (M.O.C.). CITRUS SOLV CONCENTRATE is also a strong drag/slat cleaner/lubricant as it provides a non-stick barrier to ensure materials do not buildup.

DIRECTIONS:

For light accumulations of tar and grease, CITRUS SOLV CONCENTRATE can be diluted up to 25:1 with water.

-For heavy accumulations of tar and asphalt, CITRUS SOLV CONCENTRATE should be used undiluted.
