- Keep out of reach of children.
- Store in closed, labeled containers.
- Do not store near heat, sparks or flame.
- Do not pressurize drums to empty them.
- Use with adequate ventilation.
- Refer to SDS for additional safety information.

HMIS RATINGS

PWS 2000

LIQUID DESCRIPTION:

PWS 2000 is a premium parts washer solvent made for cleaning all metal parts and tools. It is made from the oils of citrus plants, making it stronger and safer than other chlorinated or hydrocarbon-based solvents.

PWS 2000 quickly dissolves and flushes away grease and dirt and can be used to soak parts or to brush clean. It leaves a light oil film on parts to protect against rusting and corrosion. Relatively slow evaporation rate reduces losses to atmosphere.

DIRECTIONS:

PWS 2000 is a ready-to-use product. It can be used in conjunction with most part washer systems as well as any dip tank operations.

PWS 2000 can also be brushed or sprayed directly onto parts outside of a parts washer system.
