# SANITARY LUBRICANT

## AEROSOL DESCRIPTION:

SANITARY LUBRICANT is formulated especially for the sanitary requirements of food and poultry plants. Heat stable from -40°F to 392°F.

SANITARY LUBRICANT is ideally suited for lubrication of conveyor parts, rollers, guide rails, grid belts, cams, casters, gears, sprockets, stirrups, plungers, slides, chains and cables, dicers and slicers. Ideal for dairies, breweries, meat packing plants, restaurants, hospitals or canneries. Also an excellent wire pulling lubricant as the foaming action creates a better clinging action.

**\*When used according to label directions, this product is safe to use in USDA Inspected Meat and Food Processing.**

## DIRECTIONS:

- Shake well before using. Remove cap and hold 8 to 10 inches from surface.
- Spray until desired area of lubrication is wet.
