

# liquid cleaners/degreasers

Since 1927, Arrow-Magnolia has helped people solve their cleaning and maintenance problems with some of the finest products available today.

## HIGHLIGHTS

- Heavy Duty Cleaner/Degreaser
- Non Scaling, Water Soluble
- Economical Liquid
- Non Flammable
- Biodegradable
- USDA Approved A-1

## TECHNICAL PROPERTIES

- Vapor Pressure: **16**
- Volatility: **71**
- Solubility: **Yes**
- Specific Gravity: **1.0745**
- Vapor Density: **N/A**
- pH: **13.5**
- Evaporation Rate: **Slower**

than Ether

- Physical Description: **Clear**

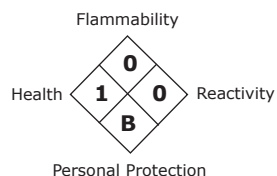

**Red Liquid w/No Odor**

## SAFETY CAUTIONS

- Keep out of reach of children.
- Keep from freezing.
- Shelf life of one year.
- Refer to SDS for additional safety information.

## HMIS RATINGS

# STSC-1050

## LIQUID DESCRIPTION:

STSC-1050 is a highly concentrated, specially formulated, heavy duty steam cleaner designed for the removal of all types of heavy soils from a wide variety of surfaces.

Non-flammable, biodegradable, and without the harsh fumes of typical heavy duty degreasers, STSC-1050 leaves surfaces clean, bright and streak free. It's fast penetrating action quickly removes grease, oil and heavy dirt from concrete and metal surfaces. It is highly concentrated for economical use.

STSC-1050 also reduces clogged lines due to undissolved particles and soils.

**\*When used according to label instructions, this product is approved for use in USDA Inspected Meat and Food Processing Facilities.**

## DIRECTIONS:

\*Using STSC-1050 on food contact surfaces should be followed by a potable water rinse.

-STSC-1050 has a wide variety of application methods including steam cleaner, pressure sprayer, pump up sprayers and brushing on.

For most applications, dilute 40:1 with water. For heavier duty soils and cleaning, 10:1 or even 1:1 is acceptable. For lighter duty and/or steam cleaning 128:1 will do the job. For heavy duty steam cleaners (high volume and pressure), proportionately less of the product will be required to accomplish the job.

~~DO NOT~~ STSC-1050 is not recommended for use on aluminum surfaces as severe etching and pitting could result.
